

Postcard Viewer Extension - Version 1.0

This extension is a wrapper for the Postcard Image viewer by Felix Turner.

<http://www.simpleviewer.net/postcardviewer/>

Postcard Viewer is yet another cool way to add an image viewer to your web site. The interface is based on the real world metaphor of a set of postcards shuffled onto a surface. This extension for Quick 'n Easy Web Builder automatically generates all the necessary HTML code and data files for you!

Features

- Intuitive image navigation, using mouse or keyboard (use spacebar and cursor keys)
- Cross platform - Windows/Macintosh/Linux (requires Flash 7 or higher).
- It looks great!

Note: Images will not be displayed in design mode. You must preview or publish the page to see the final result!

Description of the Properties

Images

Add one or more images to the image viewer. Only jpg images are supported!

Columns

Specifies the number of thumbnail columns.

Cell Dimension

Pixel width and height of the square cell that contains images.

Frame Width

Width of image frame in pixels.

Zoom Out percentage

Image scale percentage when zoomed out (set this to a lower value if you have too many images to fit in the browser).

Zoom Out percentage

Image scale percentage when zoomed in.

Background color

Specifies the background color of the image viewer.

Text Color

Color of title and caption text.

Frame Color

Color of image frame, navigation buttons and thumbnail frame.

Gallery XML file

Specifies the name of the gallery data XML file.

If you want to use multiple SimpleViewer galleries on your website then this name must be unique, otherwise they all will use the same data!

Pro Version

PostcardViewer-Pro does not include the download link. Note however that this extension does not support the advanced customization that is available in the Pro version!

If you click the 'Pro Version' button then you can select the path of the pro version (postcardviewer.swf). In that case this version of the viewer will be published instead of the free version.

You can purchase the PostcardViewer-Pro version here:

<http://www.simpleviewer.net/postcardviewer/pro/>

How to install this extension so it is available in Quick 'n Easy Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:
/Documents/Quick 'n Easy Web Builder/extensions/

License agreement

This extension is not officially supported; it is made available as an extra service for the registered users of Quick 'n Easy Web Builder that find it useful. It is provided "AS IS" without warranty of any kind, either expressed or implied.

Requirements

Quick 'n Easy Web Builder 1.0 or higher.
Flash Player 8 or higher.
