Simple Viewer Extension - Version 1.0

This extension is a wrapper around the Simple Viewer Image viewer by Felix Turner.
http://www.simpleviewer.net/simpleviewer/

Simple Viewer is a cool way to add a professional image viewer to your web site. This extension for Quick 'n Easy Web Builder automatically generates all the necessary HTML code, data files and thumbnails for you!

Features
- Intelligent image pre-loading.
- Intuitive image navigation
- Customizable interface - Set text color, frame color and width, navigation position.
- Cross platform - Windows/Macintosh/Linux (requires Flash 7 or higher).
- Keyboard Navigation (Cursor keys, Home, End, Page Up/Down)
- Mousewheel navigation

Note: Images will not be displayed in design mode. You must preview or publish the page to see the final result!

Description of the Properties

Images
Add one or more images to the image viewer. Only jpg images are supported!

Use Flickr
Defines whether to use Flickr or a local XML file as the source of the images and text.

> **Note**
> Flickr images will not be displayed in design/preview mode. You must publish the page to your website to see the final result! This is a Flash security 'feature'.

Flickr UserName
The Flickr user id of the photos to display. If this parameter isn't specified then everybody's public photos will be searched.

Example: If you leave this field empty and your enter 'flower' in the **Tags** field then your website will show all public images on Flickr tagged with the word 'flower'!

Flickr Tags
A comma-delimited list of tags. Photos with one or more of the tags listed will be returned.

Gallery Style
Gallery Style defines some of the gallery look and feel. Can be:
- MODERN - Default style.
- COMPACT- Designed to work for small size galleries.
- CLASSIC - SimpleViewer v1.9 style.

Gallery title
Text to display as gallery title.

Thumbnail columns
Specifies the number of thumbnail columns. To disable thumbnails completely set this value to 0.

Thumbnail Rows
Specifies the number of thumbnail rows. To disable thumbnails completely set this value to 0.

Thumbnail position
Position of thumbnails relative to image. Can be "top", "bottom","left" or "right".

Frame Width
Width of image frame in pixels.

Text Color
Color of title and caption text.

Frame Color
Color of image frame, navigation buttons and thumbnail frame.

Background color
Specifies the background color of the image viewer.

Gallery XML file
Specifies the name of the gallery data XML file.
If you want to use multiple SimpleViewer galleries on your website then this name must be unique, otherwise they all will use the same data!

Pro Version
SimpleViewer-Pro does not include the download/promo link. Note however that this extension does not support the advanced customization that is available in the Pro version!

How to use the pro version of Simple Viewer?
1. Click the 'Pro Version' button
2. Select the **simpleviewer.swf** file from the SimpleViewer Pro distribution (web\svcore\swf\simpleviewer.swf).
3. The next time you publish the page, the extension will use this version of the viewer instead of the free version. And you will notice that the download/promo link is no longer visible.

You can purchase the SimpleViewer-Pro version here:
http://www.simpleviewer.net/simpleviewer/pro/

How to install this extension so it is available in Quick 'n Web Builder?
You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:
/Documents/Quick 'n Easy Web Builder/extensions/

License agreement
This extension is not officially supported; it is made available as an extra service for the registered users of Quick 'n Easy Web Builder that find it useful. It is provided "AS IS" without warranty of any kind, either expressed or implied.

Requirements
Quick 'n Easy Web Builder 1.0 or higher.
Flash Player 8 or higher.
