

## **Shout Book Extension - Version 1.0**

This extension is a very simple guestbook where visitors of your website can leave a message. It is based on a PHP script created by Mirza Bajric.

The Shout Book will be displayed inside an inline frame, so **there is no need to change the file extension of the page to PHP** where this extension is used.

### ***Description of the Properties***

#### **EntriesPerPage**

Number of entries per page.

#### **EnableFrameBorder**

Specifies whether to enable the frame border.

#### **BackgroundColor**

Specifies the color of the background.

#### **BorderColor**

Specifies the color of the table border.

#### **LinkColor**

Specifies the color of links.

#### **TextColor**

Specifies the color of the text.

### ***Extra instructions***

1. Upload 'shoutbook.dat' to your web server. This file will be used the storage for the message.
2. Change the permissions of 'shoutbook.php' to 777 or 755 otherwise you won't be able to write data.

You only have to do this once!

### ***How to install this extension so it is available in Quick 'n Easy Web Builder?***

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

\Documents\Quick 'n Easy Web Builder\\extensions\

### ***License agreement***

This extension is not officially supported; it is made available as an extra service for the registered users of Quick 'n Easy Web Builder that find it useful. It is provided "AS IS" without warranty of any kind, either expressed or implied.

***Requirements***

Quick `n Easy Web Builder 1.0 or higher.  
PHP support on the server.
