Grey Box One Site
This is a simple way to display a external page from your site by simply clicking on a text link and it will open in a lightbox style fashion you can add what ever site you wish to be displayed

Description of the Properties
General
GreyBox OneSite Window Url
Insert the website address that you wish to open with greybox.

GreyBox OneSite Page Title
Displays the site name of the site that you want to visit. Example Google

Specify a page name to open in with page size. (See Default For Example)
Displays the name of the site that you want to visit. Example Visit Google

GreyBox OneSite Browser Width
Specify the width of page to be used for display in greybox.onesite.
Note for best results keep the width of the page to 800 maximum I have noticed that if you make it anymore than this the page wont center and gets pulled to the left of display/monitor, but feel free to test and width that you wish to use.

GreyBox OneSite Browser Height
Specify the height of page to be used for display in greybox.onesite
Note for best results keep the height of the page to 550 maximum I have noticed that if you make it anymore than this the page page displayed drops below the setting of the page Example 1024x768. But feel free to test any height in the extension that you wish to
