

Cookie Policy - Version 1.0

As of May 26, 2012 every Website available to European visitors and owned by European companies must follow the EU E-Privacy Directive passed in 2011. This means sites must notify users that tracking technology is being used, the reason for that technology. And although Quick 'n Easy Web Builder does not have any functionality that uses cookies, you may have used external advertising services (like Google AdSense) that do use this type of cookies.

This extension was designed to show a (growl-like) notification message about the use of cookies. After the user clicks the link a cookie is stored on their computer so the message doesn't display again. You can also let the message disappear automatically after a few seconds. In that case it will be displayed each time the user visits the website.

Of course you can also use this extension for other purposes. You can even use multiple notifications on the same page! They will automatically be arranged on the right side of the page.

For the implementation of this extension we've used the following open source scripts:

- jQuery Cookie Plugin by Klaus Hartl
<https://github.com/carhartl/jquery-cookie>
- Gritter for jQuery by Jordan Boesch
<http://www.boedesign.com/>

Properties

Cookie Name

Specifies the name of the cookie. This cookie will be used to prevent the message from being displayed the next time the user visits the website. This cookie will only be stored if the user clicks the 'Don not show this message again' link.

Sticky

Specifies if you want it to fade the message out on its own or just sit there.

Style

Specifies the style of the notification message. There are two styles:

- Dark (black background)
- Light (white background)

Text

Specifies the text of the notification message. This field can also contain HTML.

Example:

```
Our website uses a number of cookies to improve your experience when  
using the website. We also use analytics cookies to monitor how people  
use the website, with a view to making improvements and making the site  
more useful.<br><a class="check" href="#" style="color:#ccc">Do not  
show this message again</a>.
```

Please note the link we've added to give the user the ability to hide the message the next visit. When you change the text be careful not to remove the HTML tags!

Title

Specifies the title of the notification message.

Time

Specifies the time you want the notification to be alive for before fading out (in milliseconds). '**Sticky**' must be set to **false**.

How to install this extension so it is available in Quick 'n Easy Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

License agreement

This extension is not officially supported; it is made available as an extra service for the registered users of Quick 'n Easy Web Builder that find it useful. It is provided "AS IS" without warranty of any kind, either expressed or implied.

Requirements

Quick 'n Easy Web Builder 1.5 or higher
