Online Photo Album Extension - Version 1.0

Online Photo Album is an easy and feature-rich online photo album solution for Quick 'n Easy Web Builder. It can display images from a folder on the server without the need to republish the page.

Features:
- Loads all images from a folder on the server.
- No database required.
- Supports pagination and 'Next/Previous' navigation.
- Many customization options.
- Supports images border and CSS3 box shadow.

Requirements:
- This extension requires PHP on the web server.
- The file extension of the page must be set to PHP (in the page properties)!

Images folder
Specifies the folder on the server where the images will be stored.
For example: **./images/** (where 'images' is a sub folder of the current folder).
All jpg, png and gif images placed in this folder will be displayed.

Note that this option is case sensitive! Make sure your images have lowercase file names!

To manage the images you can create your own upload form (for example by using the software's built-in form processor) or you can simply upload the images through FTP. The images will automatically be added to the album the next time you load the page!

Navigation
Specifies the type of navigation at the bottom of the album.
- None
- Page Numbers
- Next/Previous

Target
Specifies what happens when the user clicks on an image.

- **_self**
  The larger version of the image will be displayed in the same browser window.
- **_blank**
  The larger version of the image will be displayed in a new browser window.
- **_parent**
  Opens the larger version of the image in the parent frame
- **<frame name>**
  The larger version of the image will be displayed in another window. For example in an inline frame. You can specify the name of the target window in the Name field.

Background Color
Specifies the background color of the object.

Border Color
Specifies the border color of the object.

Border width
Specifies the width of the border.

Overflow
The overflow property can be used to control the overflow behavior of the object.
- None
  The content of the object is fully visible. No clipping will occur.
- Hidden
  The content is clipped, but the browser does not display a scroll-bar to see the rest of the content.
- Scroll
  The content is clipped, but the browser displays a scroll-bar to see the rest of the content.
- Auto
  If the content is clipped, the browser will display a scroll-bar to see the rest of the content.

Thumbnail Images

Thumbnail Size
Specifies the size of the (automatically generated) thumbnail images.
Note that if you change this value the nit will affect the images already on the server!

Horizontal/Vertical alignment
Specifies the alignment of the image/text within the table cell.

Border Color/Border width
Specifies the border color and width of the thumbnail.

Columns
Specifies the number of images per row.

Rows
Specifies the number of rows per page.

Cell Padding
Specifies how much space you want between the contents and inside edges of cells.

Cell Spacing
Specifies how much space you want between the cells in the table.

Text

Specifies the style for the navigation. You can also change the font type, size, style and color of the title.

Shadow

Configure box shadow (also called drop shadow) for the thumbnail images. This feature requires a CSS3 enabled browser!

How to install this extension so it is available in Quick 'n Easy Web Builder?
You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:
/Documents/Quick 'n Easy Web Builder/extensions/

License agreement
This extension is not officially supported; it is made available as an extra service for the registered users of Quick 'n Easy Web Builder that find it useful. It is provided "AS IS" without warranty of any kind, either expressed or implied.

Requirements
Quick 'n Easy Web Builder 1.5 or higher
Requires PHP installed on the web server!
