

HTML5 Video Playlist Extension - Version 1.0

This extension adds a playlist to the standard HTML5 video player.

Note that the appearance of the HTML5 video player differs from browser to browser. For example, it will look different in Chrome than in IE or FireFox.

The browser determines the look of the player. However, the colors, font, text and padding of the playlist can be customized.

There may be a fully customizable version of this extension in the future, but the main focus is the playlist functionality.

Playlist

The video items that make up the video playlist.

For each item, you can select a video file. The most common used format is mp4, which is supported by all popular browsers.

Also, you will need to set a **Title** and **Length** of the video.

Optionally, you can also set a **Poster** image, which specifies an image representing the video. This will be used for preview, when the player has not started yet.

Volume

Specifies the startup volume for playback of HTML5 video player.

Auto play

Enable this option to automatically start playing when the page loads.

Loop

Enable this option to automatically repeat playback of all files.

Style

The style properties set the appearance of the playlist.

Text

The text properties can be used to set the labels in the playlist.

How to install this extension so it is available in Quick 'n Easy Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:
/Documents/Quick 'n Easy Web Builder/extensions/

Requirements

Quick 'n Easy Web Builder 5.0 or higher

License agreement

This extension is not officially supported; it is made available as an extra service for the registered users of Quick 'n Easy Web Builder that find it useful. It is provided "AS IS" without warranty of any kind, either expressed or implied.
