

## PhotoBook Extension - Version 1.0

This extension is based on a JavaScript by Henk Vrieselaar:

<http://www.henkvrieselaar.nl/>

PhotoBook is an animated slideshow that tries to simulate the effect of flipping through the pages of a book.

This extension was created with Extension Builder to demonstrate how to dynamically generate JavaScript arrays by using a mixture of `<xsl:text>` and `<xsl:value-of>` tags in a xsl template. The Extension Builder project file is separately available.

## ***Properties***

### **Images**

This property specifies the images that will be displayed by PhotoBook. You should select at least 4 images!

### **BorderColor**

Specifies the color of the border (if enabled).

### **EnableBorder**

Specifies whether to display a border.

### **Speed**

Specifies the speed of the flipping.

### **Delay**

Specifies the delay between two images.

## ***Notes***

- For the best results, set the width of this extension to 2x the image width. Set the height to the height of the images.
- You can use only 1 (one) PhotoBook per page.

## ***Requirements***

WYSIWYG Web Builder 5.5 or higher.

This extension was created with Extension Builder 1.1
