Highslide JS

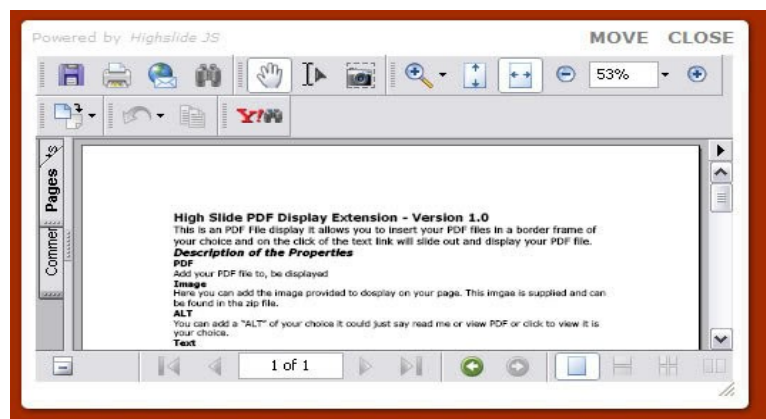

Javascript thumbnail viewer by Torstein Hønsi

What is Highslide

Highslide JS is an open source image, media and gallery viewer written in JavaScript. These are some of its advantages:

- Quick and elegant looking.
- No plugins like Flash or Java required.
- Popup blockers are no problem. The content opens within the active browser window.
- Single click. After opening the image or HTML popup, the user can scroll further down or leave the page without closing it.
- Lots of configuration options and scalability without compromising on simplicity.
- Outstanding, unconditional and free user support for both commercial and non-commercial users.
- Compatibility and safe degrading. If the user has disabled JavaScript or is using an old browser, the browser redirects directly to the image itself or to a given HTML page.

Compatibility - tested with:

IE 5.5 - 8.0	Works
IE 4.0	Falls back nicely
Firefox 1.5 - 3.5	Works
Opera 8.5 - 10.5	Works
Netscape 7.2	Works
Netscape 4.79	Falls back nicely
Safari 2.0 - 4.0 on Mac, 3.0 - 4.0 on Windows	Works
Google Chrome	Works
Konqueror 3.5	Works

WHAT IS A COMMERCIAL WEBSITE?

A commercial website is a website which purpose is generating revenue or cash flow of any type, and that isn't under a non-profit organization. So if you're selling a product, selling advertisement, selling a service or just marketing a commercial business, your site is commercial. A company website is also commercial even if it doesn't sell anything, as it's purpose is to front a commercial company.

REDISTRIBUTION

You are allowed to distribute Highslide JS with non-commercial packages given that you fulfill two conditions:

- Emphasize to your users that Highslide JS is not free for commercial use. You can do this on your download page or when your users activate Highslide in your application.
- Provide a link back to this web page in the same location.
