

Fixed Object

Description: "Emphasize" and make particular content on your page stand out by keeping them always visible on the visitor's browser screen, using this script. The script uses CSS's "fixed" positioning to accomplish this in modern browsers, while for older browsers that don't support "fixed" (such as IE6), switches to "absolute" positioning to simulate the effect.

Fixed Object Properties

1. Fixed Object Settings

Fixed Object Target ID	
Fixed Object Browser Positioning	2
Fixed Object Distance X	10
Fixed Object Distance Y	10
Fixed Object Hide (Timer)	0

2. Fixed Object jQuery

Fixed Object jQuery Select	<script type="text/javascript" src="js/jquery
----------------------------	---

1. Fixed Object Settings

Fixed Object Target ID

Indicate the ID of its desired WYSIWYG Web Builder of object. You find the respective ID of the object in the object manager or in the Site Manager/General

Fixed Object Positioning

Sets the starting position of the element relative to one of the 4 corners of the browser window. Possible Integer values are 1 (upper left), 2 (upper right), 3 (lower left), or 4 (lower right). Defaults to 2

Fixed Object Distance X

Sets the position of the element offset from its orientation. The syntax is [x, y], or the horizontal and vertical coordinates of the element. (Browser corner Default set to 10)

Fixed Object Distance Y

Sets the position of the element offset from its orientation. The syntax is [x, y], or the horizontal and vertical coordinates of the element. (Browser corner Default set to 10)

Fixed Object Hide (Timer)

1000 = 1 second) If you do not wish the object to fade out then a setting of 0 needs to be entered into the extension. To automatically have the object fade out again set the variable in extension to 5000.

2. Fixed Object jQuery

Fixed Object jQuery Select

Leave blank when using with any other jQuery script on the same page that uses the same script or use `<script type="text/javascript" src="js/jquery-1.4.2.min.js"></script>` when using on its own.
