

## **jQuery FAQ - Version 1.0**

This extension provides an easy way to create a Frequently Asked Questions (FAQ) page. Basically this creates a list of items which the user can expand/collapse by clicking on the 'question'. This can be useful for FAQs, a list of events with event details, a listing of members with bios, a list of products with details, etc.

### **Items**

In this section you can manage items for the FAQ. Click **Add** to insert a new item or **Edit** to modify the selected item. **Remove** will remove the selected item.

### **Style**

In this section you can change the appearance of the FAQ items.

### **Custom arrow images**

By default the extension will automatically use the built-in arrows images 'faq\_arrows.png'. If you like you can create your own arrow images. Both the expanded and collapsed state of the arrow should be in the same image file, like this:

The image on top is for the collapsed state. The bottom image is for the expanded state. The arrows should be 16x16 pixels. So the total image size will be 16x32 pixels.

### ***How to install this extension so it is available in Quick 'n Easy Web Builder?***

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:  
/Documents/Quick 'n Easy Web Builder/extensions/

### ***License agreement***

This extension is not officially supported; it is made available as an extra service for the registered users of Quick 'n Easy Web Builder that find it useful. It is provided "AS IS" without warranty of any kind, either expressed or implied.

### ***Requirements***

Quick 'n Easy Web Builder 1.5 or higher
