

## Ecwid Web Shop Extensions - Version 1.0

This is a set of extensions for using the easy but powerful Ecwid E-Commerce platform. Ecwid is an online e-commerce platform that allows you to add shopping cart functionality to any current site and also get a mobile and Facebook store in one package.

Creating a basic account is free. Upgrade options available for advanced functionality (discount coupons, product downloads, Enhanced SEO capabilities and much more).

### Usage:

First of all, setup an Ecwid account at this address:

<http://open.ecwid.com/fjLw2>

You'll receive an email at the email address you specified with your "Ecwid ID" that you need to specify in these extensions for identifying your store. Copy your code and put it into the "ecwid ID" parameter in every ECWID extension widget you place into your page; it should be a number.

### Note:

All functionality is based on standard Ecwid scripts, so your web shop will run on the Ecwid servers. The extensions do not implement any shopping cart functionality; they just make it easier to integrate the Ecwid shop in your Quick 'n Easy Web Builder website.

The following Ecwid extensions are available:

### **ECWID - Product Browser**

This is the main container and it is mandatory; this will contain your products, categories, search results, the checkout options etc.

### **ECWID - Minicart**

This widget contains the Shopping Bag; when viewing products, you can Drag & Drop them to the shopping your basket.

### **ECWID - Horizontal Categories**

Display a list of categories using tabs

### **ECWID - Vertical Categories**

Display a list of categories using a vertical layout

### **ECWID - Search Box**

Search for products

### **ECWID - Language**

Optionally change the language of your store. Only use this when your store is not English.

### ***How to install the extensions so they are available in Quick `n Easy Web Builder?***

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:  
/Documents/Quick `n Easy Web Builder/extensions/

### ***License agreement***

This extension is not officially supported; it is made available as an extra service for the registered users of Quick `n Easy Web Builder that find it useful.

This extension may not be sold, rented, redistributed, sublicensed or modified without permission of the author.

This extension is provided "AS IS" without warranty of any kind including, but not limited to, warranties of merchantability, fitness for a particular purpose and non-infringement. In no event will Pablo Software Solutions be liable for any direct, indirect, incidental, special, exemplary or consequential damages, including damages for loss of profits, loss or inaccuracy of data, incurred by any person from such person's usage of this extension if advised of the possibility of such damages.
