

NiceScroll

NiceScroll makes it possible to customize the scrollbars of your website with the look and feel of iPhone/iPad scrollbars.

This extension is a wrapper for the NiceScroll jQuery plugin by InuYaksa:

<https://github.com/inuyaksa/jquery.nicescroll>

Alignment

Specifies which side of the page to place the scrollbar.

Auto Hide Mode

Specifies if the scrollbar auto hides.

Border Color

Specifies the color of the scrollbar border.

Border Radius

Specifies the border radius for the scrollbar.

Border Style

Specifies the border style for the scrollbar.

Border Width

Specifies the border size for the scrollbar.

Box Zoom

Enable zoom for box content.

Color

Specifies the color of the scrollbar.

Emulate touch

Enable cursor-drag scrolling like touch devices in desktop computer.

Hide Cursor Delay

Specifies the delay in microseconds to fading out scrollbars.

Mouse Scrollstep

Specifies the scrolling speed with mouse wheel (pixel).

Opacity - Minimum

Specifies the opacity of the scrollbar while inactive.

Opacity - Maximum

Specifies the opacity of the scrollbar while active.

Padding

Specifies padding for rail bar.

Scroll Speed

Specifies the scrolling speed.

Rail Color

Specifies the color of the background to the scrollbar.

Selector

Specifies the elements to apply the scrollbar to. This is a command separate list of IDs. prefixed with '#'

By default, the scrollbar of the page will be 'skinned'. But it's also possible to apply the scrollbar to other elements like a text object, text area, layer or inline frame.

Example:

body, #wb_Text1, #TextArea1, #InlineFrame1

Tip: to add a scrollbar to a text object, set the overflow property to 'scroll'

Width

Specifies the width of the scrollbar.

Z-Index

Change z-index for scrollbar div.

How to install this extension so it is available in Quick 'n Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

/Documents/Quick 'n Easy Web Builder/extensions/

Requirements

Quick 'n Easy Web Builder 7 or higher
