

PDFObject Extension

A lightweight JavaScript utility for dynamically embedding PDFs in HTML documents. Based on a script by Philip Hutchison: <https://pdfobject.com/>

PDF embedding is not supported by certain browsers. PDFObject detects browser support for inline/embedded PDFs. If embedding is supported, the PDF is embedded. If embedding is NOT supported by the browser, the PDF will NOT be embedded. PDFObject inserts a fallback link to the PDF when the browser does not support inline PDFs. This ensures your users always have access to your PDF.

For more information about PDFObject and know limitation please visit: <https://pdfobject.com/>

Fallback HTML

Displayed when the browser doesn't support inline PDFs.

Filename

Specifies the filename of the PDF file.

Height:

Specifies the height of the embedded PDF.

The default is '100%', but for flexible layouts you may want to set the height in pixels. For example: '400px'

Note: the following properties may not be supported by all browsers!

Messages

Turns the document message bar on or off.

Navigation Panes

Turns the navigation panes and tabs on or off.

Pagemode

Display bookmarks or thumbnails.

Scrollbar

Turns scrollbars on or off.

Statusbar

Turns the status bar on or off.

Toolbars

Turns the toolbar on or off.

Zoom

Sets the zoom factor in percentages.

Optionally, you can also add X/Y coordinates (in pixels).

Example: 200,0,100

(set the zoom level to 200 and scroll to the x/y coordinates 0, 100)

How to install this extension so it is available in Quick 'n Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

/Documents/Quick 'n Easy Web Builder/extensions/

Requirements

Quick 'n Easy Web Builder 7 or higher
