

Google Maps

This extension can be used to add Google Maps to your website.

API Key

To use Google Maps on a website, you will first need to get a Google Maps API key from the Google Cloud Console.

<https://developers.google.com/maps/get-started>

Latitude/Longitude

Specify the coordinates for the map center.

Markers

Specifies markers on the map.

For each marker you can set the Latitude, longitude and text.

Zoom

Specifies the initial zoom level.

Controls

Show or hide controls: scale, fullscreen, pan, streetview, map type, zoom.

Full Width

If the extension is used with a layout grid, then it's possible to make the map flexible (width: 100%).

Make sure you also set the height to 'fixed' otherwise height will be 0!

How to install this extension so it is available in Quick 'n Easy Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

Requirements

Quick 'n Easy Web Builder 9 or higher
